About Me

Motivated diploma student with proven proficiency in Python, Java, and C++, specializing in machine learning and web development, and leveraging exceptional teamwork and communication skills to drive real-world problem-solving.

Education

Government Tool Room and Training Centre, Magadi — 2023 - Present

Diploma in Artificial Intelligence and Machine Learning

Shree Jnana Bharathi High School, Huliyurdurga — 2022 - 2023

SSLC

Technical Skills

Tech Languages: Python, HTML5, CSS3, DART

Skills: IOT, Automation

Database: MySQL

Technologies: VS Code, Antigravity

Projects

EcoBrain — Flutter (Dart), REST APIs, HTTP Package.

- Developed an IoT monitoring and automation app using Flutter with real-time APIs for environmental data, weather, analytics, and device control, implementing GET/POST for live updates with auto-refresh and optimistic UI.

Terminator — Python, OpenAI API, News API and Picovoice API.

- TERMINATOR is a voice-controlled desktop assistant that activates with the wake word “terminator.” It executes voice commands to open applications, play music, check the weather, send emails, and generate images, enabling hands-free system control.

NRLM Government Web Portal — HTML5, CSS3, Vanilla JavaScript, Google Fonts, CSS Grid.

- Developed a responsive bilingual (English/Kannada) government web portal for NRLM-KSRLPS Kunigal Taluk with SHG directories, scheme browser, photo gallery, and savings calculator using HTML, CSS, and vanilla JavaScript.

AdmitAI — Python, Flask, MongoDB, REST API, HTML, CSS, JavaScript, Cloud Database (Atlas)

- Developed an AI-powered college admission screening system using Flask, MongoDB Atlas, and JavaScript, featuring a timed MCQ test, anti-cheating detection, one-attempt control, and an admin ranking dashboard.

Other Projects

- GTTC Magadi Web, EcoBrain Web Version, Mood-Flow, Tic-Tac-Toe and more.
